

April 27, 2026

To the Admissions Committee,

I am pleased to write this letter of recommendation in support of Farnaz Rezvani's application to your PhD program. My name is Nicole Myers, MSHI, RN, and I serve as the Lab Manager of the Pitt HexAI Research Laboratory at the University of Pittsburgh School of Health and Rehabilitation Sciences. In this role, I work closely with the researchers, graduate students, and collaborators who make up our lab, giving me a clear and consistent view of each member's contributions and professional conduct.

I have had the opportunity to work alongside Farnaz Rezvani since she joined our laboratory in late 2024 as a graduate research assistant. I can speak with confidence to Farnaz' character and capabilities as observed through our collaboration. Farnaz and I share authorship on multiple research manuscripts, and through that process I have come to know her as an exceptionally reliable and driven researcher.

Our collaborative work spans several projects at the intersection of explainable AI and health informatics. These projects involve complex, multidisciplinary teams and demanding timelines, and Farnaz has consistently delivered high-quality contributions on schedule. In my experience managing a research laboratory, the ability to meet deadlines without sacrificing rigor is a rare and valuable quality — one that Farnaz demonstrates consistently.

What stands out most to me about Farnaz is her work ethic. She approaches every task with diligence and a genuine commitment to the research mission. She is proactive, organized, and communicates effectively with collaborators across disciplines. She has also taken on a mentorship role for junior lab members, a responsibility she handles with maturity and care.

I am confident that Farnaz Rezvani has the professional discipline and collaborative spirit to thrive in a doctoral program. I recommend her without reservation and believe she will be a meaningful contributor to your academic community. Please feel free to contact me if I can provide any additional information.

Sincerely,

Nicole Myers, MSHI, RN

Lab Manager, Pitt HexAI Research Laboratory
